ELECTRIC CLOTHES DRYER BEST PRACTICES

Sensor Drying

Use sensor drying, not timed drying. ENERGY STAR dryer models incorporate advanced moisture sensors to help you reduce your dryer's energy use. This feature ensures that your dryer will automatically shut off when clothes are dry.

Low heat setting

Longer drying cycles on a low heat setting use less energy. When you purchase an ENERGY STAR certified clothes dryer, look in the informational materials shipped with the product for which cycle was tested for certification and how the dryer's other cycles or settings may use more or less energy.

Savings by the pair

An ENERGY STAR certified washer/dryer pair will save even more energy and money while doing your laundry. Clothes washers that have earned the ENERGY STAR will get significantly more water out of your clothes than a conventional model. This makes it easier for clothing to dry in an ENERGY STAR certified dryer using less heat. Less heat means energy savings and reduced wear and tear on your clothes.

Congratulations on your decision to buy an ENERGY STAR certified electric clothes dryer. Please fill out completely. All information below is required.
