

# AN IMPORTANT MESSAGE FOR **NEW HAMPSHIRE ELECTRIC CUSTOMERS**

## **Notice of Rebate**

As part of the Regional Greenhouse Gas Initiative, the State of New Hampshire participates in the quarterly auction of emissions allowances that comprise the state's annual allocation of carbon dioxide emissions. In accordance with NH state regulations, any auction revenue in excess of one dollar received for each allowance is to be rebated to all retail electric customers in the state. For the period August 2022 to July 2023, your total delivery charge includes a credit of \$0.00407 per kWh associated with this rebate. This equates to a monthly savings of approximately \$2.44 for a customer using 600 kWh per month.
