

Unitil 2018 Performance

Along with all other MA utilities, Unitil is required to monitor and report our performance every year to the Massachusetts Department of Public Utilities. The program requires that we measure ourselves against specific benchmarks. Failure to achieve appropriate benchmarks results in penalties being paid, which are returned to customers as a credit on their bills.

In 2018 Unitil had superior performance in several service quality categories, including response to odor calls, service appointments met and average number of minutes without power per customer.

2018 Highlights

We aim to find more efficient and cost-effective ways to improve our operational performance, reduce the number of interruptions you experience, and continue to improve on our level of customer service.

- We did what we said we were going to do – meeting 99.9% of our gas appointments and 99.6% of our electric appointments.
- 99% of our customers were satisfied with the way we handled their service requests.
- We met the performance commitments in the areas shown on the reverse side of this flyer.

Unitil 2018 Report Card*

Our Measures	Our Commitment	Our Performance	Achieved
Service Appointments Kept as Scheduled	– Gas	98.496%	<input checked="" type="checkbox"/>
